

Vadim Palagin

Frontend Developer

Frontend Developer with 4+ years of experience in web development. Started with freelance projects using WordPress and vanilla JavaScript, then moved to building product solutions. For the last 2 years, I've been specializing in React/Next.js, working on startups, API integrations, and frontend architecture. Experienced in Web3 platforms, cryptocurrency integrations, and modern development technologies. Known for fast learning, problem-solving, and delivering clean, high-quality code in team environments.
